TO ARCHITECTS.

JENNINGS'S INDIA RUBBER TUBE COCKS AND WATER CLOSETS.

These Cocks and Water Closets have now been BEFORE THE PUBLIC FOUR YEARS. From the first all Scientific Persons acknowledged their simplicity, but doubted their durability. Time has proved that the INDIA RUBBER TUBE will stand the greatest pressure, and WEAR LONGER THAN any kind of METAL, in proof of which they are to be found in all the Large Water and Gas Works, Vinegar Works, Soap Manufactories, Breweries, Distilleries, Prisons, Lunatic Asylums, Hospitals, &c. &c. and references of the highest order will be given to any persons making application.

EVERY CLOSET supplied by GEORGE JENNINGS is WARRANTED FOR THREE YEARS, and, at the end of TEN YEARS, fitted with a New India Rubber Tube, and made EQUAL TO NEW FOR 10s.

Illustrated Particulars sent free on application to GEORGE JENNINGS, 29, Great Charlotte-street, Blackfriars-road.

PRIZE MEDAL, CLASS 28.

HIGH-PRESSURE VALVE COCKS.—LAMBERT'S PATENT.

These Cocks have, during the last few years, been extensively and most successfully used in many Towns under continuous high pressure, varying from 100 to 300 feet; their efficiency and durability is by experience established.

The Equilibrium Ball-valve is simple and certain in its action, and is cheaper than the common Cocks now in use.

Enamelled iron, self-acting, and other closets, upon economic arrangements, suitable for public buildings, cottages, asylums, &c.

THOMAS LAMBERT and SON,
Brass and Iron Founders, Mount-street, New-cut, Lambeth.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of cheap soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse, by preventing the enormous waste of water in places of this description, to which water companies now so strongly and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted by stopping the valve, weighting the handle, or by other means. It is so constructed that, as long as the discharge valve remains open, a further supply cannot enter the service pipe from the mains.—Drawings and description may be obtained from STOCK and SON, Manufacturers of Plumbers' Brass-work, Sanitary Closets, Rotary Screw-down Taps, Fire Plugs, Gas Fittings, and Church Furniture in Iron and brass, Temple-street, Birmingham.
